

Abhijeet Mendhe

Data Engineer | abhijeetmendhe7@gmail.com | +91 8872383735

OVERALL EXPERIENCE : 7.9 Years

TECHNICAL SKILLS

- **Programming Languages:**
Python,
PySpark
- **Databases:**
MySQL, Elasticsearch, Snowflake,
HDFS
- **Frameworks:** Flask, Kedro, Airflow,
Hadoop, Spark 3.0+
- **Platform:** Jupyter, Databricks,
AWS (Amazon Web Services), GCP
(Google Cloud Platform),
Kubernetes
- **Build Tools:** Docker, TeamCity, LSE
- **Version Control:** GitHub, BitBucket

TRAINING/CERTIFICATIONS

Cloud Certification: AWS
Developer Associate

ACHIEVEMENTS

Received the STAR Award in Q1
2025.

PUBLICATIONS

- Secure QR-Code-Based Message
Sharing System Using
Cryptography and Steganography
- **Publication:** 2018 First
International Conference on
Secure Cyber Computing and
Communication IEEE (ICSCCC)
held in Dec 2018
- **Link:** [ieeexplore.ieee.org/
document/8703311](https://ieeexplore.ieee.org/document/8703311)

EDUCATION

**Master of Technology (Information
Security)**
NIT, Jalandhar

- **Data Engineering Leadership:** Over 7.9+ years of experience designing and managing large-scale ETL pipelines across banking and ad-tech domains, ensuring reliable data delivery for business-critical dashboards and analytics.
- **Cloud Cost Optimization:** Reduced AWS expenditures by engineering PySpark-to-Java UDF modules and implementing scalable PDF/ report generation processes, achieving significant operational savings.
- **Performance Acceleration:** Enhanced reporting efficiency by cutting generation time from 5 minutes to 30 seconds per report, directly improving client decisionmaking speed.
- **DevOps & Automation Expertise:** Deployed and maintained web applications using Flask, orchestrated workflows with Airflow, kubernetes and implemented CI/ CD pipelines with Git and Agile methodologies to streamline delivery and improve reliability.

EMPLOYMENT HISTORY

Lead - Technology | Dec 2021 - Present
Synechron Technologies

Project: Fund Transfer Pricing (FTP)

Client: CITI Bank

Role: Data Engineer

Duration: April 2025 – Present

Responsibilities:

- Architected and optimized ETL pipelines using PySpark, Hive, and SQL to deliver reliable data for critical dashboards and complex business reports.
- Implemented CI/ CD workflows by automating job scheduling with AutoSys, TeamCity, and UDeploy, ensuring seamless integration and deployment.
- Transformed extensive SQL procedures that created business reports into PySpark code to generate reports at scale.

Project: Batch Reporting System (BRS)

Client: TIAA Bank (USA)

Role: Data Engineer

Duration: Feb 2023 to March 2025

Responsibilities:

- Engineered and optimized ETL workflows using PySpark and Java to deliver actionable insights. Achieved significant AWS cost savings by developing a PySparkto-Java UDF module, enabling scalable report generation.
- Streamlined reporting operations by reducing generation time from **5 minutes to 30 seconds per report (46 report pipeline)**, improving efficiency and client satisfaction. Facilitated team growth through regular problem- solving and knowledge-sharing sessions, strengthening technical expertise and collaboration.

Project: Advanced Analytics CoE for SME

Client: ENBD Bank (UAE)

Role: Data Engineer

Duration: Jan 2022 to Dec 2022

Responsibilities:

- Conducted requirement gathering and hypothesis development, applying advanced **feature engineering with PySpark** to improve data quality and support accurate financial product analysis.
- Designed, developed, and maintained scalable **data ingestion pipelines using Kedro** and Spark, ensuring seamless data flow, integrity, and reliability while monitoring performance for continuous optimization.

Environment: Windows 10 VM, VS Code, Python and PySpark, AWS, Jupyter, Kedro, Git, Jira, Oozie, Hive

Software Engineer | May 2019 - Dec 2021

Tyroo Technologies

Project: Vidtech.ai

Role: Data Engineer

Responsibilities:

- Leveraged **PySpark** to distribute large- scale data processing, significantly improving ingestion and processing speeds. Designed and implemented complex **ETL pipelines** to ingest transactional and event data from Mobile Measurement Partners (MMP), ensuring accuracy and scalability. Built and optimized **BigQuery tables on GCP**, delivering efficient data storage and retrieval for high- volume workloads.
- Architected a cloud-native environment on **AWS** by integrating **Jupyter Notebooks, Airflow, Docker, and Kubernetes** to create a **Databricks- like ecosystem** for scalable data engineering. Developed and deployed **Flask-based web applications**, automated reporting workflows via web scraping, and designed interactive dashboards in **Google Metabase** to visualize campaign performance.

Blockchain Developer | Aug 2018 - Apr 2019

Pennybase Technology Solutions Pvt. Ltd.

Project: TRAI

Client: Airtel

Role: Blockchain Developer

Responsibilities:

- Developed and hosted **REST API endpoints using Python and Flask** to support blockchain- based telecom workflows, enabling smoother integration and testing across teams.
- Designed secure, scalable APIs for the TRAI blockchain project, streamlining development processes and ensuring reliable communication between distributed components.

Environment: Ubuntu, PyCharm, Python and PySpark, Git, Databricks, K8s, AWS, GCP, Elasticsearch
